

## COVID-19 Child Screening Questionnaire

Form 1519e

The following questions are used by the Children's Center "Screener" who is screening children prior to entering the building. The Screener is asking the parent the questions below to determine if the child may attend school that day. **These questions are asked EVERYDAY.**

The Screener is using the questionnaire as guide to facilitate questions with the parent. The Screener is recording the results of the child screening on Form 1519d (Child Screen Check-in). Form 1519d will only note if the child CAN or CANNOT attend school that day. The Screener is not capturing protected health information under HIPAA.

This questionnaire should be used in conjunction with our current health policies and procedures.

**Children may not enter the building and attend school today if the parent answers "yes" to any of the following questions below.**

1. To your knowledge, has anyone in your child's household been exposed to someone diagnosed with COVID19 in the last 14 days?
2. Has your child or anyone in the household had an unexplained fever of 100.4 or above in the past 24 hours?
3. Does anyone in your child's home currently have new or unexplained cough or shortness of breath?
4. Has your child taken any fever-reducing medicine this morning?
5. ***From a safe distance and wearing mask, the Screener will check the child's temperature.*** Does the child have a temperature of 100.4 or higher?

### **After asking the screening questions**

The staff member asking the questions ("Screener"), will initial in the "yes" or "no" Column on **Form 1519d** (Child Screen Check-in) for the day to indicate whether a child was able to enter the building and attend school based on daily health screening.

- If the child **CANNOT** attend school, please give the parent a copy of **Form 1519a** (Parent Information Sheet) and review when the child can return.
- If the child **can** attend school, please follow the process to check the child into their classroom.
